

■ UMETA hand lever injection guns for sealing applications

the ideal set with injection packer, nipples from UMETA

UMETA injection guns

are perfect tools for sealing applications like renovation of damp walls, repair of cracked concrete, etc.

- special viton sealings allow easy cleaning with solvents and multiple use
- With different tube lengths for various filling volumes up to 1,000 cc /34 oz.

75/PKI Zinc

Injection gun with orange polyamide cap for approx. 550 cc (17.5 oz) filling volume

Technical details

barrel version	made of zinc-plated steel
	Ø 56 mm
barrel length	296 mm
suitable	for resin
filling capacity	550 ccm (17.5 Oz.) bulk grease
connection thread	M 10 x 1 or G 1/8
	with filling valve
operating pressure	400 bar / 5,800 PSI
output	approx. 1.9 ccm (0.06 Oz.)/stroke
testing pressure	800 bar / 11,600 PSI
packed in	polybag
weight	960 g
	+ accessories and packaging
dimensions (LxWxH)	356 x 125 x 67.5 mm

Connection	Packaging	accessories	Ref. No.:
M 10 x 1	Polybeutel	ohne Zubehör	V000334
M 10 x 1	Polybeutel	mit Schlauch 341/GLN	V000408
M 10 x 1	Polybeutel	mit Düsenrohr 111/G	V000855
M 10 x 1	Polybeutel	mit Düsenrohr 111/G + Schlauch 341/GLN	V000897
G 1/8	Polybeutel	ohne Zubehör	V001440
G 1/8	Polybeutel	mit Schlauch 341/GLN	V001511

Please ask for suitable accessories!
our most common standard sets:

- tube 110/G - 111/G with hydraulic coupler

- hose 340/GLN - 300mm L, Ø 11 mm, with hydraulic coupler

can be combined with manometer:
pressure release an option available
